

Our differences

INFILTRATUBE, The easiest most practical solution **GRAVEL FREE**

- Our gravel free solution
1 meter length = 2kg

VS

- Conventional way :
1 meter = 1.1kg + 0.5kg + 30kg

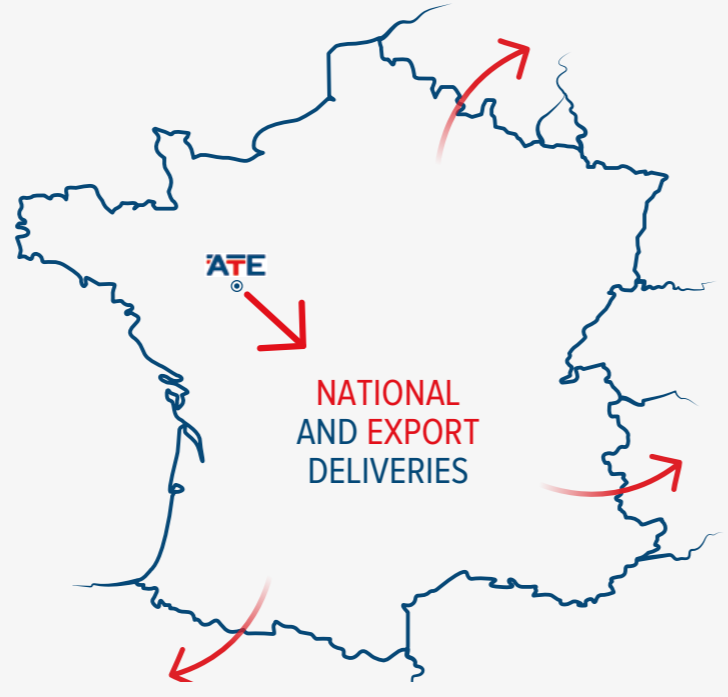

Why choose our gravel free solution?

- ATE know-how
- Quick and easy Solution to install
- Efficient in most soils
- Cheapest solution on the market

INNOVATIVE
RESPONSIVE
& PRODUCER

We attach a lot of importance to innovation : we put a lot of efforts in developing and designing quality products which give professionals better cost saving and easier install rate.

INFILTRATUBE
| SN4

GRAVEL FREE WATER INFILTRATION SYSTEM ON PLOT OF LAND

INFILTRATUBE

Designed and Made in France

A pipe dedicated to clear and rain water infiltration **without gravel**

Characteristics and Advantages

- SN4 Accredited and enhanced impact resistance
- Sold in 2 or 2.5m bar
- Far superior Infiltration capacity compared to conventional system
- Very quick installation

The advantages

- Infiltration system with installation without gravel = 3 in 1 product
- Thanks to its rigidity, slop setting is easy to achieve
- Can be used in most soils
- Possible installation under roads due to its mechanical resistance (SN4)

Economical

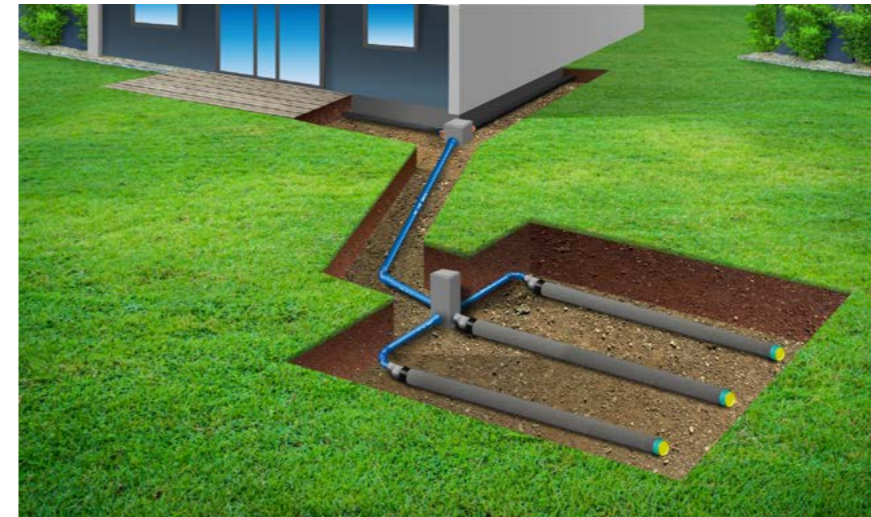

- No need for gravel or geotextile
- Less earth to evacuate as soil from the site can be reused (if dried and stone free)

Available dimensions

	Diameter (mm)	Bar Length (ml)	Palletisation (ml)
Horizontal packing	ø200	2.50	45

Applications

■ INFILTRATUBE, the solution for rainwater infiltration

■ INFILTRATUBE, the solution for clear water infiltration after approved household waste water treatment

ACCESSORIES :

COUPLER

Ø 200

REDUCER

Ø 100 / 200

CAP

Ø 200

* Cap color can vary
